In general, it is still a fun game less a very fun, simple game. Played pc game when I was younger and now it's on mobile! I agree with many other reviews - the middle is proving very hard to earn! The price mechanic seems like a voodoo, selling high enough for profit, but not so high that I lose sales.. however, this is an additional challenge. I feel like the old PC game was easier; do you consider that you would have problems with options? I like the way you use ads. Some ads are not suitable for children, less difficult to get proper pricing. Try to increase the price for something when the weather was hot, because it seems logical that demand will be high. I didn't get a single ad and sale losing all my popularity. Maybe I still need some time to get used to the game. It's still a great and refreshing tycoon game here at the Play Store, better than flawless games that reproduce from nowhere and currently flood the market. I love the game less. It may be better to put another upgrade on this more less it was a fun game for the first few stages, but after the 3rd stage your profits seem to be significantly reduced compared to the first and second stage, even with upgrades I noticed hardly any improvement on the gain. This game seems like it was designed for you to watch ads for that extra \$15, which does little impact and ultimately keeps you in your pocket where you should constantly watch ads... I know it's free, but do us a favor and give us a \$5 price tag on this game and give us what we want. less less
